CONTENTS

Preface vii
Committee Members viii
List of Participants xi

Invited Papers and Reviews

Problems caused by irradiation deformation in CANDU reactors, *G.J. Field* 3
Implications of Zircaloy creep and growth to light water reactor performance, *D.G. Franklin and R.B. Adamson* 12
The irradiation creep and growth phenomena, *V. Fidleris* 22
Irradiation growth in zirconium and its alloys, *A. Rogerson* 43
Irradiation creep and growth of pressure tubes in HWR Fugen, *M. Koike and T. Asada* 62
Effects of temperature and neutron fluence on irradiation growth of Zr–2.5 wt% Nb, *R.G. Fleck, R.A. Holt, V. Perovic and J. Tadros* 75
Irradiation growth of zirconium single crystals: A review, *G.J.C. Carpenter, R.H. Zee and A. Rogerson* .. 86
Measurement of irradiation creep of zirconium alloys using stress relaxation, *A.R. Causey, F.J. Butcher and S.A. Donohue* 101
Irradiation creep and embrittlement behavior of AISI 316 stainless steel at very high neutron fluences, *D.L. Porter and F.A. Garner* 114
Intrinsic point defects in hexagonal close-packed metals, *W. Frank* 122
Point defect diffusion in α-Zr, *G.M. Hood* 149
A review of computer models of point defects in hcp metals, *D.J. Bacon* 176
A review of microstructure evolution in zirconium alloys during irradiation, *M. Griffiths* 190
Displacement collision cascade damage in hcp metals, *W.J. Phythian* 219
The effect of intergranular stresses on the texture dependence of irradiation growth in zirconium alloys, *A.R. Causey, C.H. Woo and R.A. Holt* 225
Theory of irradiation deformation in non-cubic metals: Effects of anisotropic diffusion, *C.H. Woo* 237
Irradiation creep models – An overview, *J.R. Matthews and M.W. Finnis* 257
Irradiation creep mechanisms: An experimental perspective, *F.A. Garner and D.S. Gelles* 286
Mechanisms of irradiation growth of alpha-zirconium alloys, *R.A. Holt* 310
General discussion of creep and growth mechanisms: Their theoretical and practical implications, *R. Dutton* 339

Contributed Papers

The creep and growth of zirconium alloys as determined from the bending of ion-irradiated cantilever beams, *J.R. Parsons and C.W. Hoelke* 351
Microstructure and creep in Ni(Al) alloys under proton irradiation, *P. Jung and H. Klein* 360
Influence of alloying elements on the dislocation loops created by Zr^+ ion or by electron irradiation in α-zirconium, *C. Hellio, C.H. de Novion and L. Boulanger* 368
Sink strengths for hcp magnesium, *N. Smetniansky–De Grande, A. Sarce, E.J. Savino and C.N. Tome* 379
Microstructural characterization of neutron-irradiated and post-irradiation annealed Zircaloy-2, *R.A. Herring and D.O. Northwood* 386
Radiation-induced precipitation in Zircaloy-2, *O.T. Woo and G.J.C. Carpenter* 397
Grain boundary sinks in neutron-irradiated Zr and Zr-alloys, *M. Griffiths, R.W. Gilbert and C.E. Coleman* 405
